

Cancer

Cancer, Weight Loss, skincare

6 Aug 2006

Our names are Maureen & Steve Thorpe from Rosebery.

My husband and I both have a background in I.T. in Sales and Technical Support. 10 years ago my husband was diagnosed with cancer at the base of his tongue, and as he was only 48 years old he was given extensive chemotherapy and radiation treatment. This particular cancer is very aggressive and only about 20% of the people with it survive! After his treatment, we decided to move out of the city to a country Hotel. Unfortunately Steve was only able to work 3 or 4 hours and then he needed to rest for a few hours. This went on for 4 years, and he was getting quite depressed and unhappy. He was not able to eat spicy foods, or drink many things including wine as they all irritated his mouth, so everything had to be very bland in taste. One day a friend suggested he try Herbalife products, but he was very sceptical. However he decided to give them a try. After only two weeks on the products he was very excited. He no longer felt tired, could stay on his feet all day, and felt fantastic. As an added bonus he went on to lose 15 kilos. 6 years later is his now completely cured of his cancer, which is great, but he can now eat spicy foods and drink wine again, in fact he is in better health now that he was 10 years ago. Because of his product results I started on the products and ended up losing 8.5 kilos in 8 weeks and have kept it off for over 6 years.

We also both use the fabulous "Dermajetics" skin care range, and both of us love the products as they have keep our skin looking and feeling fabulous. We have many people looking astonished when we tell them that Steve is 58 years of age, and I attribute that to our "Inner and Outer" Nutrition. We love the products and use them every day now for good overall health and nutrition.

Regards

Maureen & Steve Thorpe

Skin Cancer - 30kg Weight Loss

15 Jan 2007

Agi Mooy from Scone and this testimonial has been prompted from a recent health check with my specialist.

In 2002 I went to our local GP as there was a mole on my back that I did not like the look of. I was told not to worry about this mole as it wasn't considered to be the colour or shape of anything out of the ordinary.

I didn't settle with that line of thought and booked in to see another GP. Fate would have it that there was a visiting medico from Victoria, a little more efficient and interested in what I had to say.

He took one look and took a scraping for testing and within 2 days called me into his office and asked me to sit down, not to panic, however what he had to say was serious.

The mole on my back was a malignant melanoma very serious category 8 and that I needed to go to the John Hunter Hospital within that week - to take care of any paper work outstanding and make a will.

I don't remember much of the days that followed. This was November 2002.

I first needed to go through machines and have different areas of my body mapped and tattooed in the direction of spreading as this cancer travels rapidly and through the blood stream.

Next was Maitland Hospital for surgery. It is very important not to become stressed and remain calm during these times.

My appointments to my Specialist, Linda Fenton in Greenhills, started with every two weeks, and then another abnormality in my ovaries. There were cysts developing and I had these removed including the ovaries with another lot of surgery in March 2003.

Then in May 2003 I enquired about Working from Home, hopped onto the Herbalife products and received tremendous weight loss results of 30 kilos and 72cms of body fat in the first 12 months, but also unbelievable health results.

My Specialist could not believe the improvement to my health in general, but was truly astounded by my recovery. I believe I owe my total remission (not cure), feeding my body the absolute balance of correct nutrition to allow my body to continually repair itself day in and day out.

Herbalife has definitely without a question given me back my life.
